

Khaled Saeed Ragab

Software Engineer

Cairo, Egypt | 01270901118 | [Email](#) | [Linkedin](#) | [GitHub](#) | [ICPC_ID](#) | [Codeforces](#)

EDUCATION

Bachelor of Computers and Artificial Intelligence - **Benha University (BFCU)**

Sep 2023 – Present

PROJECTS

-
- **Depi Project – Learnio (Online Learning Platform):** Built a scalable full-stack e-learning platform featuring secure authentication, role-based access control, course management, enrollment system, and an interactive dashboard. Worked on responsive frontend development, RESTful API integration, relational database design, and performance optimization while following modern software engineering practices to deliver a reliable and maintainable solution. May 2026
 - **Tourism Landmarks :** Created a web application using **HTML, CSS, Bootstrap, PHP, and MySQL**, allowing users to browse and explore tourist destinations stored in a database Dec 2025
 - **Connect 4 Game:** Implemented the classic **Connect 4 game** using **Python and GUI**, featuring a graphical board, player interaction, and win-condition algorithms Nov 2025
 - **Gym website:** The website is a system to managed memberships and practices to enhance customer engagement as a project to ITI in HTML, CSS and Bootstrap. Aug 2024
 - **Bakery store:** Our bakery specializes in a freshly baked bread and treats made. From crusty sourdough and fluffy croissants to decadent cakes and cookies in HTML and CSS. May 2024
 - **Two squares game:** This game is played on a board of 4 x 4 squares. Two players take turns: each of them takes turn to place a rectangle on the board. A square cannot be covered twice. The last player who can place a card on the board is the winner in C++. Apr 2024

EXPERIENCE

-
- **ACPC Africa & Arab Championship Qualifier — 2026:** Top 50 teams out of +2500 teams Aug 2026
 - **Programming Instructor at Thinkey Academy** Jul 2026 - present
 - **Coordinator at Coach Academy** Jan 2026 – Mar 2026
 - **Leader and Instructor (Mentor) – ACM ICPC Benha** Sep 2024 – Present
 - Mentor university students in competitive programming and algorithmic problem-solving.
 - Conduct regular training sessions on topics such as programming basics and data structures
 - Provided guidance and support to help students prepare for regional and national ICPC contests.
 - **Contestant at ECPC 2024 and 2025, solved +3500 problems at Codeforces and leetcode** Jul 2024 - present

Certificates & Honors

- Ranked 11th in ECPC day 8 and received an official Certificate of Achievement. Aug 2026
- Certificated from Huawei in AI course (HCIA-AI V4.0) Sep 2025
- Certificated from ITI in Winter intern as Back-end with .NET Mar 2025
- Certificated from ITI in summer intern as front-end. Aug 2024
- Competition at Google Developer Clubs (GDG). Mar 2024

SKILLS

- Programming Languages: C#, C++, Python, PHP and Java.
- Problem Solving and Competitive Programming, Structure Programming, Data Structures and OOP.
- Frontend: HTML, CSS, Bootstrap and JavaScript.
